PROFESSIONAL SUMMARY

Results-driven data analyst with 2 years of experience extracting, transforming, and analysing data to drive operational and economic decision-making. Proficient in SQL, Python, R, Excel, Power BI, Tableau, Prometheus, and Grafana, with hands-on experience in ETL processes and writing complex queries. Skilled at developing dashboards and reports that communicate data insights clearly to non-technical stakeholders, and experienced in collaborating with cross-functional teams to translate business needs into actionable findings. Adept at ensuring data accuracy, integrity, and ethical data management across the full analysis pipeline.

EXPERIENCE

Vale Fintech, Hybrid — Data and BI Analyst

August 2024 - PRESENT

- Integrated Prometheus and Grafana with the core transactions database to monitor real-time system health, track API uptime, and analyse transaction processing downtimes across all product lines, enabling proactive incident detection and operational decision-making for 8 departments
- Designed, developed, and deployed interactive dashboards tracking customer churn rates, product usage, and inactivity across millions of records, authored the underlying SQL queries, and engineered the full ETL pipeline from database to visualisation, reducing churn analysis turnaround time by 100%
- Architected and automated MySQL-to-Python data pipelines for sales performance, product growth analytics, and cross-departmental reporting across 8 business units, eliminating manual data extraction entirely
- Engineered Excel-based reporting solutions directly connected to the database, empowering executive stakeholders to independently access and refresh live data, reducing ad-hoc reporting requests by 50%
- Automated end-to-end Power BI reporting pipelines serving 6 departments, eliminating manual refresh dependencies and accelerating reporting workflows by 50% organisation-wide
- Owned the extraction, transformation, and loading of millions of

SKILLS

SQL, Python, R, Power BI, Tableau, database management, Excel, Prometheus, Grafana, ETL processes, complex query writing, and data visualisation.

records across the database to deliver mid-week, weekly, and monthly executive reports that directly informed strategic and operational decisions.

- Contributed to the design and documentation of a comprehensive database schema diagram, mapping all active tables, entity relationships, and primary keys across the organisation's data infrastructure, strengthening data governance frameworks
- Conducted advanced statistical analysis and exploratory data analysis on millions of financial transaction records to identify performance trends, revenue patterns, and operational anomalies, generating actionable recommendations adopted by senior leadership.

FUTA Divine God's Favour Cooperative Society, on-site — *Administrative Assistant and Data Analyst*

JANUARY 2023 - MAY 2023

- Analysed financial records and loan portfolios to build comprehensive debt profiles for debtors, identifying defaulters and flagging high-risk accounts to support recovery decisions
- Leveraged Remita transaction data and financial analytics to detect loan defaulters, improving the accuracy of financial reporting and debt tracking across the cooperative
- Conducted monthly bank reconciliation across all accounts, ensuring accurate financial records and full compliance with internal policies and regulatory standards
- Designed and deployed Excel dashboards to monitor daily loan requests, repayment trends, and portfolio performance, giving management real-time visibility into lending activity
- Architected a SharePoint-based data management system to securely store and organise sensitive financial records, improving data accessibility and enforcing data governance standards

EDUCATION

The Federal University of Technology, Akure — *B.Tech*

2017 - 2023

Earned a Bachelor's degree in agricultural and resource economics with first-class honours.
